Dear Potential Employer

Thank you for visiting my website. I'm Monkyyy or Michael Boston; a Self-taught programmer currently enrolled at Bridgerland Technical College. I'm open to work.

I won't fit neatly into anyone's box, but I'm a quick learner, efficient and resourceful and I just want to write good software. I believe the future is in data oriented design and template meta-programming enabling Alexander Stepanov's version of generic programming. Of the choices that have all the functionality of C and templates; C++ and D, I believe D is strictly better, cleaner and more importantly faster to compile.

I will use D as a scripting language, as it compiles instantly; while it's not unheard of for a C++ and Python project requiring *hours* to compile. So unfortunately I've thrown in my lot in this tiny unknown language.

My work history is mostly odd jobs, my education all over the place and I don't know what I've lost track of, so I need someone to take a risk on me; but I'm extremely competent and who better to have outside-of-box ideas than an outside-the-box hire.

If you have any interesting problems or work; please don't hesitate to contact me about how I would approach your problems.

Sincerely,

MICHAEL
